Encino/Tarzana Community Plan CEQA comments, items IV-V

Motion: The ENC PLU adds the following comments to previously discussed Encino Tarzana Community Plan CEQA comments items IV-V.

Attachment A

IV. BIOLOGICAL RESOURCES: Would the project:

a) Have a substantial adverse effect, either directly or through habitat modifications, on any species identified as a candidate, sensitive, or special status species in local or regional plans, policies, or regulations, or by the California Department of Fish and Game or U.S. Fish and Wildlife Service?

o Compare coyote and other native species increased visibility due to loss of hunting grounds; a direct result of decrease in building to building greenscape buffers; stemming from decreased rear/sideyard setbacks from existing community plan to current Blanket Residential zoning & future effects from rezoning of RA-RE in Encino.

b) Have a substantial adverse effect on any riparian habitat or other sensitive natural community identified in local or regional plans, policies, regulations or by the California Department of Fish and Game or US Fish and Wildlife Service? Association of Environmental Professionals 2016 CEQA Guidelines Appendices 316

o study effects of densification near LA River/Balboa Parks & the stream between Libbet & Gloria, on Magnolia.

c) Have a substantial adverse effect on state or federally protected wetlands (including, but not limited to, marsh, vernal pool, coastal, etc.) through direct removal, filling, hydrological interruption, or other means?

o study effects of larger homes, which divert water into storm drains, carrying chemicals, & debris toward the ocean.

d) Interfere substantially with the movement of any native resident or migratory fish or wildlife species or with established native resident or migratory wildlife corridors, or impede the use of native wildlife nursery sites?

o Maintain Greenspace between buildings, frontages, and non existing sidewalk corridors provide nesting for animals for native wildlife nursery sites.

e) Conflict with any local policies or ordinances protecting biological resources, such as a tree preservation policy or ordinance?

o Study the loss of Tree canopy in Encino utilizing **USC Professor Travis Longcore, PhD** study, & why there was no enforcement mechanism for the 2009 Encino Tarzana Community Plan in protection of Green Spaces

o Study designating of all street trees as "Cultural Monuments" in Encino with an effective enforcement mechanism.

f) Conflict with the provisions of an adopted Habitat Conservation Plan, Natural Community Conservation Plan, or other approved local, regional, or state habitat conservation plan?

o study impact of Rezoning R1 side yard setbacks from existing/prevaling per tract/community plans vs new minimum 5' reduced side yard set back & 15' rear yard set back.

o Reinstitute original prevailing setbacks per Encino Tarzana Community Plan to preserve existing trees, planted in buffer areas

V. CULTURAL RESOURCES. Would the project:

a) Cause a substantial adverse change in the significance of a historical resource pursuant to § 15064.5?

O study impact of Rezoning R1 with side yard setbacks from existing per tract plan/community plan vs new minimum 5' reduced side yard set back & 15' rear yard set back & the rezone from RA to RE. The ENC requests that the original sideyard setback be restored to existing buildings to maintain neighborhood look; That Mansionization, allowed by the blanket rezoning, shall not be permitted for the community plan.

O Study the current community plan's lack of enforcement mechanism changing the culture of Encino. Although not currently cited as a historically contributing area; per § 15064.5 A(D)(4), an area such as the housing tract between Balboa Blvd (E boundary, Lindley (W Boundary), Victory (N Boundary) & Burbank (S Boundary), Amestoy Estates, Sherman Oaks Circle , old historic homes on large parcels such as the homes at the end of Noeline, or who had notable figures reside in them, & Los Encinos, contain a unique layout and should be protected. These identified areas hence qualify as an area that "has yielded, or may be likely to yield, information important in prehistory or history" in residential tract housing communities in the Valley, particularly Encino.

b) Cause a substantial adverse change in the significance of an archaeological resource pursuant to § 15064.5?

c) Disturb any human remains, including those interred outside of formal cemeteries?
